School of Planning-CEPT-India

A typical scene of actual situation in Delhi Metropolitan

Situation become worse with growing
private motorised vehicles...

Suggested Practical measures to avoid transport in Developing countries

Behavioural Measures

- I. Re-Scheduling of working hours
- II. Promote Virtual working
- III. Exploit the power of social media to promote walking and discourage motorised vehicle usage

Urban Planning Measures

- I. Discourage Urban sprawl with Low density development
- II. Improve public transit services
- III. Parking zone reforms
- IV. Facilities for disables
- V. Real time travel information using Geographic Information Systems
- VI. Improvement in transport infrastructure

Suggested Practical measures to avoid transport in Developing countries

Urban Planning Measures

- I. Urban design of roads and pavements etc
- II. Grade Separation and roundabouts
- III. Housing to be clubbed with public transport services

Policy Level measures

- I. Promote seamlessness in public transport
- II. Futuristic master/vision plan, land use planning keeping in mind the efficiency of transport systems
- III. Limit the number of private registration in each locality
- IV. E-governance

Practical Experience in Delhi (E-Rickshaw)
